Distribution Helical Anchor Products

ECP Helical Torque Anchors™ are a part of the complete product line of helical piers, piles and steel foundation products manufactured by Earth Contact Products, LLC, based in Olathe, Kansas. ECP Utility offers helical anchors in various capacities and configurations for all aspects of the utility industry. From square bar and round shaft helical anchors to our power installed anchors, HD Extreme Anchors, or No Wrench Anchors for guy anchors, ECP has the helical anchor and accessories it fit the needs of the electric distribution power industry. The use of helical anchors as deep foundations has decreased installation times and increased job site performance due to their verifiable capacities.

No Wrench Anchors

For years the electric distribution industry has relied on helical anchors for tower and pole foundations as well as guy anchors. Being the largest consumer of helical anchors the electric power industry has embraced helical anchors for their many benefits and reliable performance.

Distribution Anchor Accessories

Adapting helical anchors to various above grade apparatuses is essential to provide a full service to the power industry. Various guy adapters, power installed rod sizes, etc. can be attached to the helical piles to resist structures from overturning forces. ECP Utility specializes in custom foundation connections to adapt our helical anchors to a variety of foundation needs. The Engineering Department of ECP Utility is available to recommend and facilitate the correct helical anchor for jobsite specific needs.

We recommend that only a registered engineer design and oversee the application of helical anchors when used in foundation repair or new construction projects.

Power Installed Torque Anchors (PITA)

We offer a complete line of power installed torque anchors for distribution guy applications. With various rod and flight size combinations we can adapt our anchors for various loads and soil conditions. Our HD Series of PITA anchors can help install anchors through tough soil conditions including soils with rock and debris that will stop most anchor installations. Single, double and triple guy anchor nuts are available for each power rod size along with guy anchor adapters for square bar helicals.
