Power Installed Extreme Guy Anchors

HD Guy Anchors

Our heavy duty power installed torque anchors are a part of the complete product line of helical anchors that are made in the USA. ECP Utility offers helical guy anchors in various capacities and configurations for all aspects of the electric utility industry. From square shaft and round shaft helical anchors to our power installed anchors and no wrench anchors, we have the helical guy anchor and accessories to fit the needs of the electric distribution power industry.

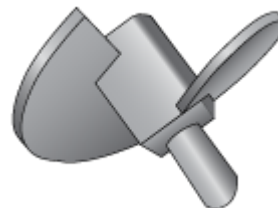

No Wrench Anchors

For many years the electric distribution industry has relied on ECP guy and helical anchors for tower and pole foundations as well as pole line hardware. Being the largest end user of helical anchors, the electric power industry has embraced the benefits of helical anchors for their unparalleled performance.

Extreme Power Installed Torque Anchors (PITA)

We offer a complete line of extreme power installed rock anchors for distribution guy applications. With various rod and flight size combinations we can adapt our anchors for various loads and soil conditions. Our HD Series of power installed anchors can help install anchors through tough soil conditions including soils with rock and debris that will stop most anchor installations. Single, double and triple eye anchor nuts are available for each power rod size along with guy anchor adapters for square bar transmission anchors.
