No-Wrench Anchors

No Wrench

We offer a complete line of No Wrench screw anchors for distribution guying applications. With various rod and flight size combinations we can adapt our screw anchors for various loads and soil conditions. Our Distribution Series of No Wrench Anchors are designed to be installed by hand or power installed.

The No-Wrench earth screw anchors are a part of the complete product line of helical guy anchors, piles and steel foundation products manufactured by Earth Contact Products, LLC, based in Olathe, Kansas. Made in the USA helical guy anchor products by ECP Utility are available in various capacities and configurations for all aspects of the utility industry. From RUS approved square bar transmission anchors, power installed, and screw in guy anchors to accessories and tooling we provide the electric utility industry with engineered products designed to perform.

For years the electric distribution industry has relied on ECP helical anchors for tower and pole foundations as well as guy anchors. Being the largest consumer of helical anchors, the electric power industry has embraced ECP No Wrench Anchors for their many benefits and reliable performance.
