Polyurethane Injection

ECP Polyurethane Resins are an innovative blend of hydrophobic/hydrophilic polyurethane resins designed to provide the ultimate solution for crack repair and void grouting applications. In contact with water, ECP Polyurethane Resins will expand up to 20 times its original volume creating a permanent, flexible and water-tight seal.

Surface Sealer Epoxy

ECP Surface Epoxy is the original low-odor, fast setting crack sealer. This two component, 100% solids, epoxy paste is moisture insensitive epoxy paste can be applied vertically, horizontally or overhead. ECP Surface Epoxy is primarily used to seal cracks prior to injecting cracks, or to adhere surface mounted injection ports to the concrete surface.

Crack Injection Accessories

ECP carries a full line of crack injection accessories that you may need for your crack injection job. Some accessories include dispensing guns, ports, static mixers and much more.
