EZ Flow Gravel Free French Drain System

The ECP EZ Poly Drain products are the industry leading geo-synthetic aggregate drainage systems for use on interior and exterior foundation drains, curtain and landscape drains, retaining walls, crawlspace, golf course drainage and any other sub-surface water management applications. This drainage system is lightweight, easy to use and environmentally friendly. The patented EZ Poly Drain gravel-free drainage system utilizes the time proven principals used in gravel systems for drainage, while eliminating the problems inherent with using gravel.

The EZ Poly Drain products are very flexible and extremely versatile which means you can use them in many applications without elbows. With up to 35% increased water flow, due to the geo-synthetic aggregate, the ECP EZ Poly Drain will remove water quickly.

Labor savings is one of the largest advantages to the EZ Poly Drain. No more hassles of moving and storing gravel to and from jobsites. No more wheel barrowing gravel to the trench. The ECP EZ Poly Drain is a complete packed drainage system ready to tackle your toughest installations in 10 foot sections.

Advantages of EZ Flow

- 50% Labor Savings
- 35% Increased Water Flow
- 100% Recycled Content
- Zero Gravel Cleanup

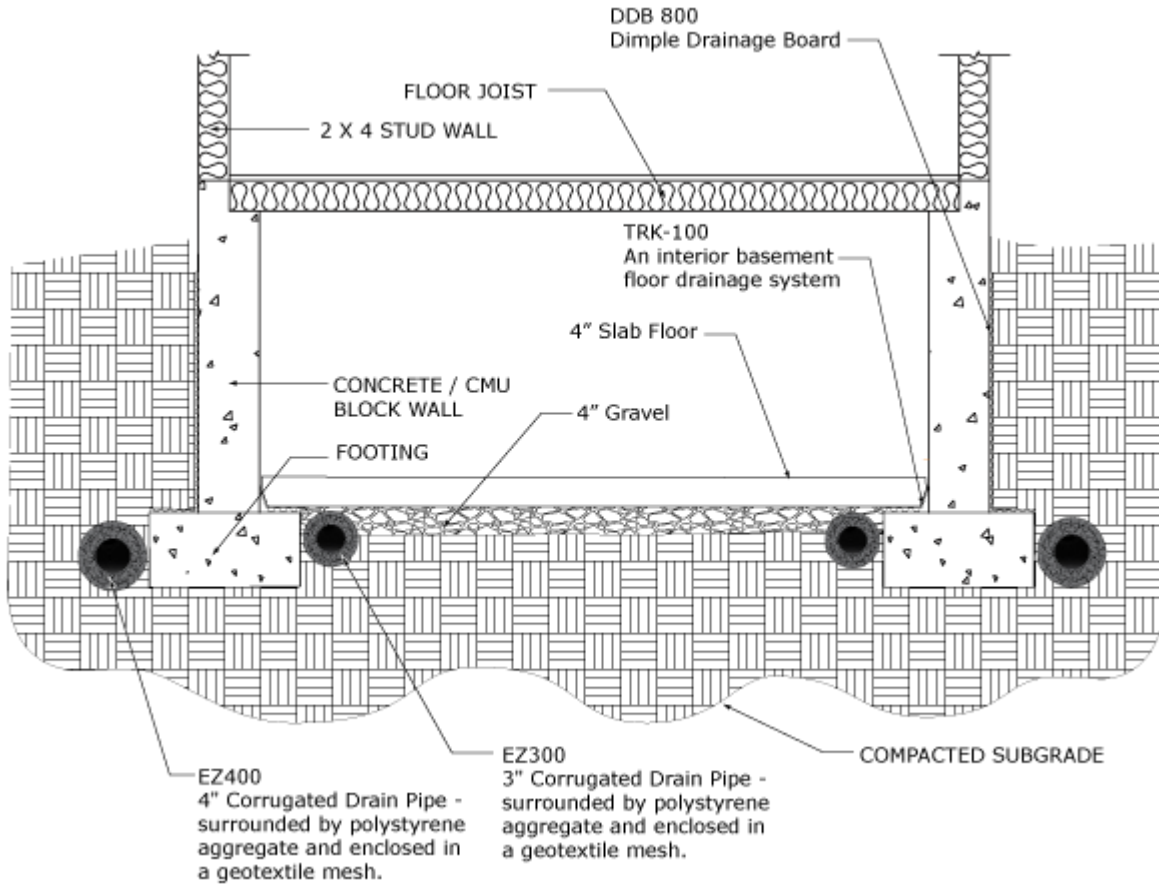

The patented polystyrene aggregate is uniquely engineered with flow channels to increase void space and thus provides increased water flow. The engineered mesh fabric covering, a 30 sieve geo-textile netting, provides the necessary filtering of soil particles to prevent clogging. Call today for more information about the ECP EZ Poly Drain.
