## Sump Pumps

Sump pumps are used for basement and crawlspace drainage purposes. The ECP sump pumps help remove water that has accumulated around and under the foundation and discharges it away from the foundation. Our sump pumps are designed to be the most energy efficient, highest performing and longest lasting sumps on the market. When combined with our unique bell shaped sump basin and a full product warranty you can rest assured that your sump pump system will last for many years to come.

The ECP lineup of sump pumps includes primary sumps from 1/3 to 1/2 horsepower that can pump up to 5,000 gallons per hour. Our battery backup sump pumps are the most energy efficient lineup of 12 volt backup sump pumps on the market. With high pumping capacities and infamously energy conservation the ECP battery backup sump pumps protect foundations from various water problems including settlement.

Most often the source of basement flooding is water build up in the soil that makes its way into your basement or crawl space. A sump pump is a final defense against basement flooding because it pumps out water from the lowest section of the basement before the water level reaches the basement floor. As groundwater level rises it is diverted into the sump pit via drainage pipe. Once water reaches a preset level in the basin the sump pump dispels the collected water outside and away from the foundation.

A sump pump can save you money in the long run by maintaining the value of your home and by protecting your investment and belongings from water damage. Besides the obvious damages to personal effects, flooding can also cause foundation problems and mold. Protect your home with an ECP Sump Pump today, to prevent problems tomorrow.

Remember, Water collected from your roof and other hard surface areas can cause flooding if it is not collected and diverted far enough away from your foundation. Surface drainage is the key to a dry basement.

### Primary Sump Pumps

Our lineup of primary sump pumps feature a redundant dual float switch systems to prevent basement flooding and unexpected pump failure. Combined with an industry leading energy efficiency these pumps will protect your basement from flooding for many years to come.

Features	Model BSP 46	Model BSP 50	Model BSP 59	Model BSP 65
Motor HP	1/3	1/3	1/3	1/2
Warranty Yrs	1.5	3	5	3
GPH @ 5'	3,420	3,480	4,200	3,960
Max. Head	31'	30'	33'	26'
Discharge	1-1/2"	1-1/2"	2"	1-1/2"
Amp Draw	3.8	4	4.3	4

### Battery Backup Sump Pumps

Our lineup of battery backup sump pumps provide unparallel performance and monitoring system that warns of any potential system problems before basement flooding can occur.

Features	Model BUSP 17	Model BUSP 29	Model BUSP 40
Volts	12	12	12
Pump Time (hrs)	12	7.5	8
GPH	2,000	2,500	4,000
Max. Head	15'	16'	17'
Discharge	1-1/2"	1-1/2"	1-1/2"
Amp Draw	3.25	9	9

### Combination Sump Pumps

Our unique lineup of combination sump pumps (primary and battery backup system) provide high pumping performance and the peace of mind of a battery backup system in case of power failure. Included is a multi-function controller and dual float switch system to protect and monitor your sump system for years to come.

Features	Model BSPC 100	Model BSPC 200	Model BSPC 300
Primary Flow @ 10' Head	2770	2770	3000
Backup Flow @ 10' Head	1000	1730	2,400
Charger Strength	.4 amps	1.6 amps	13 amps
Automatic Controller	X	X	X
Dual Float System	X	X	X
Flood Monitor	X	X	X
