# Surface Drainage & Water Collection

## Catch Basins & Grates

Use our ECP catch basins and grates to protect property against water damage caused by excess rainwater or irrigation. Use to collect water from downspouts, planter areas, and landscape sections.

### Strip Drain

ECP Strip Drains are prefabricated drains that consist of a high-profile, perforated, three-dimensional core (6" high x 1" wide x 150' long) that is fully wrapped with a filter fabric.

### Channel Drain

The ECP Channel Drain is a lightweight drain system with interlocking joints, so connections are made quickly and easily. The modular design offers flexibility as each 40" section of channel can be snapped together for longer runs or divided down to lengths as short as 4" for smaller, interlocking sections.

### Pop-up Emitters

The ECP Pop-Up Emitter provides a cost effective, yet esthetically pleasing, way to provide downspout and sump pump discharge away from foundations. ECP Pop-up Emitters are designed to rise above grade when water is present and then they are spring loaded to retract to allow for easy mowing. This simple system will provide years of maintenance free use while protecting your basement walls from hydrostatic pressure caused by excessive water in the soil.

### **Dry-Well**

ECP's manufactured Dry-Well system presents an easy to install and sustainable solution for storm water runoff. Used independently or as part of a larger storm water management system, ECP Dry-Well units collect, retain, and discharges storm water on-site, offering a gravel-free alternative to a traditional dry well.

### **Round Catch Basins and Grates**

ECP offers round catch basin and grates that can be used for downspout and sump pump discharge. As hydro-static pressure builds in the drain pipe, water will seep out the top of the grate to a suitable drainage area or storm drain.

### **Down Spout Adapters**

ECP offers different sizes of downspout adapters that can be used to connect downspouts to underground drainage systems to properly control rain water caught by gutter systems.
